Για να κανεις ενας χρηστης submit της απαντησεις στο ερωτηματολγιο πρεπει να χρησιμοποιησεις το `Submit Answers Endpoint` , η μεθοδος είναι Post στο body του request θα στείλουμε ενα Array Object

```
// Κάθε object ισοδυναμεί με μια απάντηση του χρήστη
// Πιο αναλυτικά:
// question_id (int): το ID της ερώτησης
// answer_option_ids (Array<int>) Optional πεδίο: εδώ αποθηκεύονται οι απαντήσεις
// answer_text (string) Optional: Εδώ θα μπει η απάντηση σε περίπτωση που είναι ερώτηση με κείμενο
